X-Voice Personal IP PBX is the ideal phone manager for small offices that want to acquire an advanced VoIP PBX system reducing, at the same time, phone and electric costs. X-Voice Personal IP PBX permits the management of zero fee VoIP lines and the reception of multiple calls simultaneously.

It is equipped with a large number of features such as: IVR, Fax and SMS manager, Call Manager, E-mail Call, CDR, LCR, Voice mail, music on hold, trunk mode for multi-site PBX, friendly web interface for users and technical operators, back-up and data restore. Coupled with the Gateway VoIP GSM/UMTS it allows the call forwarding towards mobile phones by using a SIM card with flat fare drastically reducing the phone costs. Needing only 40 kWh for a year, X-Voice Personal IP PBX also reduces the electric costs.

X-Voice Personal IP PBX is compatible with any IP phone system based on SIP and IAX standards.
